

Western Laminated Columns

**Built Stronger. Treated Better.
Manufactured to Perform.**

Sizes to Fit Every Build

Our laminated columns come in 3-ply, 4-ply, and 5-ply options, and are available in lengths from 10 to 40 feet, in 2-foot increments. Get the strength and size you need – without the guesswork.

At **Western**, we know how frustrating it is to deal with warped posts or premature failures. That's why we manufacture our own laminated columns, designed to solve every problem that standard posts can't.

Superior Strength

Multiple plies of premium lumber are bonded together for increased load capacity and reduced internal stress.

Better Treatment

Each layer is treated before lamination, giving you full-depth protection from rot and insects – especially in ground-contact zones.

More Stability

Made with kiln-dried, multi-piece construction to resist twisting, bowing, and cracking over time.

Consistent Quality

Every column is manufactured in-house to exact standards, ensuring straighter walls and faster installs with fewer issues on-site.

Backed by 40 year warranty.
