

How Western's Painted Steel Is Built to Last

Every Western steel panel is more than just metal – it's a system of engineered protection. This graphic shows the 5 layers of defense that make up our Sherwin-Williams painted steel.

1. Top Coat – UV-resistant, color-stable finish that gives your building its bold, lasting look.
2. Primer – Bonds the top coat to the steel, improving adhesion and durability.
3. Treatment – Converts the surface for superior paint bonding and corrosion resistance.
4. Metallic Coating – Galvalume® layer protects against rust and environmental damage.
5. Steel Substrate – High-strength base material manufactured to Western standards.

WHY WESTERN?

Our steel is manufactured with trusted Sherwin-Williams coatings for long-lasting protection, style, and peace of mind.

SMOOTH

Clean. Glossy. Traditional.

- Bright and reflective
- Easiest to clean
- High-contrast modern look
- Popular for shops, homes, and clean commercial builds

Gloss finish with bold color pop

TEXTURED

Matte. Durable. Safer to Install.

- Soft, low-sheen finish
- Safer to grip during install
- Hides screw dimples and scratches
- Great for barns, barndominiums, cabins

Balanced matte with added depth

ULTRA LOW GLOSS

Subtle. Sophisticated. Modern.

- Nearly flat finish – minimal shine
- Premium architectural appearance
- Softens color and reduces glare
- Ideal for high-end residential and designer builds

Most refined and contemporary

All Three Finishes Offer:

- ✓ Premium Sherwin-Williams paint
- ✓ 40-year warranty
- ✓ Long-term durability and color performance
- ✓ Manufactured to Western's high-quality standards

**Same steel. Same paint. Three great finishes.
The difference is all in the look **you** want.**
