Why Choose Uplift Plates?

At Western Building Supply, we're committed to offering practical solutions that save time, money, and effort. That's why we stock Uplift Plates™, a game-changing product designed for post-frame construction. Whether you're a contractor or DIY builder, these plates provide a reliable way to anchor posts in concrete—without the hassle of rebar.

Built for Speed and Strength

- **Quick & Easy Installation** – Just a few taps with a hammer and you're ready for concrete. No drilling, no mess.
- **Superior Uplift Resistance** – Outperforms traditional rebar anchoring methods.
- **Lightweight & Field-Ready** – Easy to handle and install on-site or in advance.
- **Protects Posts** – Shields center posts from moisture and decay.
- **Built to Last** – Galvanized or hot-dipped galvanized for long-term durability.
- **Code Compliant** – Meets 2012 through 2024 International Building Code standards.
